15

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/652,548

Applicant(s)

KUGLER ET AL.

Examiner

William H. Matthews (Howie)

Art Unit

3738

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 March 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 37-46 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 37-46 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____
- 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other:

Art Unit: 3738

Claim Objections

1. Claims 43,45 are objected to because of the following informalities: In each of the last lines of claims 43 and 45, ---graft component--- should be inserted between "second" and "segments". Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 37-40 and 46 are rejected under 35 U.S.C. 102(e) as being anticipated by Marcade et al. US PN 5,993,481.

Marcade et al. discloses in figures 1-10 multiple graft system embodiments and delivery systems.

Regarding claims 37-40 Figure 8 shows a single piece graft having larger ends and stents located along the entire length.

Regarding claim 46, Figures 3a-3J and 9-10 disclose a method of implanting two graft segments telescopically wherein the inner portion of the delivery system has a transition element (518).

Art Unit: 3738

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 41-45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marcade et al. US PN 5,993,481 as applied to claims 37 and 40 above, and in further view of Fogarty et al. US PN 6,123,722.

Marcade et al. discloses in figure 8 a graft system meeting the structural limitations of claims 41-45 but lacks the express written disclosure of including a bellows region in the middle portion of the graft system. Fogarty et al. teaches in figure 7B and lines 48-55 of column 18 graft systems that may comprise bellows regions for modifying the length of the graft system.

Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the graft disclosed by Marcade et al. by including a bellows region in order to provide adjustable length to the graft as taught by Fogarty et al.

6. Claims 37-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fogarty et al. US PN 6,123,722 in view of Marcade et al. US PN 5,993,481.

With regard to claims 37-45, Fogarty et al. discloses in figure 3 a tubular graft component with first and second ends (68,70) of larger diameter than the middle portion (64), a length adjustable middle and stents in both the first and second ends. The

Art Unit: 3738

length adjustable middle can comprise a bellows region (column 18, lines 48-55 and figure 7B). Furthermore, figure 4 shows various middle regions having independent stents located at the ends, the stents shown in detail in figures 3B and 3C.

With regard to claim 46, Fogarty et al. discloses a catheter system (figure 2) for deploying first and second graft segments (see column 11, lines 44-50) in a telescoping manner (see figures 3-4).

Fogarty et al. fails to disclose a transition element having a tapered portion located substantially between the first and second graft portions and that the modular components of the graft system can be formed as a single piece graft. Marcade et al. teaches graft systems in figures 2,8 and lines 55 of col. 21 through line 6 of col. 22 (for single piece graft) and figures 3a-3j and 9-10 (for tapered portion) in order to eliminate the need to deliver multiple grafts and to assist implantation of the second graft, respectively.

Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the graft disclosed by Fogarty et al. by using a single piece graft and a tapered portion in order to eliminate the need to deliver multiple grafts and to assist implantation of the second graft, respectively as taught by Marcade et al.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William H. Matthews (Howie) whose telephone number

Art Unit: 3738

is 703-305-0316. The examiner can normally be reached on Mon-Fri 7:00-4:30 (Every other Friday off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine M. McDermott can be reached on 703-308-2111. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-2708 for regular communications and (703) 305-3590 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0858.
